

GLOBAL AIRFREIGHT

COMPETITIVE DOOR-TO-DOOR SOLUTIONS FOR ALL YOUR AIRFREIGHT NEEDS

Airfreight is a vital component of many supply chains. But unless managed with skill, airfreight may be more costly than expected and also fail to yield the expected time advantages. Damco offers a range of accessible, proactive and time-driven services that put our customers and their cargo first from start to finish.

What are the benefits?

- Damco offers airfreight services through its global network of offices
- By exploring your needs with you, we can develop plans to meet your door-to-door transit time requirements at a competitive price
- Our long established carrier relationships ensure capacity availability, high service standards and durable pricing
- Multi-modal options combine air with sea, inland waterway, rail or road to provide comprehensive end to end solutions with a single point of contact
- Damco's own information portal, Damco.com, provides a personalised myDamco account and real time visibility through tailored 'milestone' reporting
- Damco brings years of innovation through our market-leading supply chain management solutions expertise to respond to your changing business needs

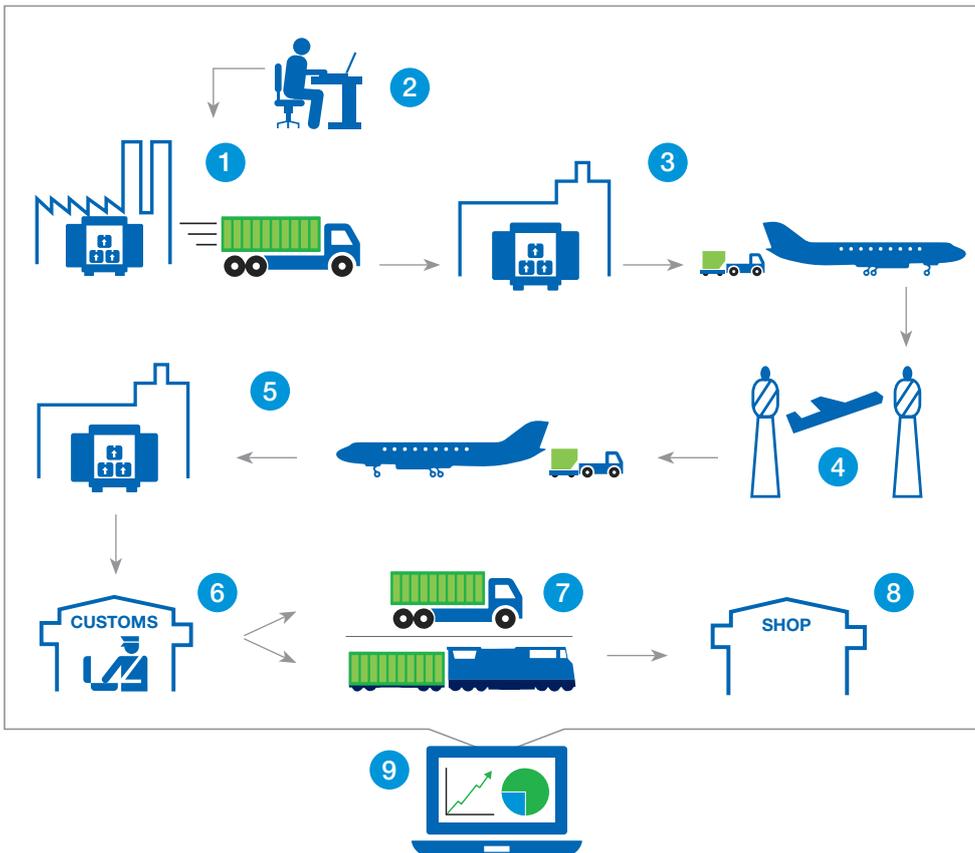

Programme Components

Components	Features
Priority Air	<ul style="list-style-type: none"> • Using first available dedicated express service. Airport to Airport transit times of 24-48 hours
Premium Air	<ul style="list-style-type: none"> • Your goods move on standard services, with generally a daily uplift. Airport to Airport transit times of 72-120 hours
Economy Air	<ul style="list-style-type: none"> • This is a consolidation service, operating weekly or more frequently and benefitting from our hub and gateway network. Airport to Airport transit time of 120-168 hours
Charters	<ul style="list-style-type: none"> • For remote locations and goods not suitable for routine flights, Damco can arrange charters on a one-off or regular basis for time critical cargoes and special situations such as product launches and humanitarian aid.
Multimodal	<ul style="list-style-type: none"> • We use sea, rail or truck connections to our hubs to offer a range of multimodal options
Additional services	<ul style="list-style-type: none"> • Flexible and efficient transport to and from air terminals • We offer comprehensive and cost-effective management of customs clearance, bonded operations, regulatory declarations and other requirements • We manage trade and shipping administration including import/export licensing, and certificates of origin • In many geographies Damco arranges full commercial insurance at advantageous rates

About Airfreight

Airfreight can reduce the total logistics cost for urgent or time-critical logistical challenges. By combining the speed of air with the cost savings of other modes, backed by smooth and efficient customs and administrative procedures, customers can enjoy the best of both worlds; reducing inventory and improving their own service offer with faster response times at affordable cost.

This is how it works:

- 1 Based on your needs, Damco will suggest the best possible transportation for your cargo. As next step, cargo departs clients' production facility
- 2 Damco assists with your insurance and/or documentation
- 3 Cargo loaded onto plane
- 4 Cargo in transit to destination
- 5 Cargo unloaded from plane
- 6 Customs clearance assistance
- 7 Cargo transported via inland logistics services
- 8 Cargo delivered to clients' premises
- 9 Full end-to-end visibility and milestone reporting will be available through myDamco customer portal and our dedicated customer service teams will inform and support in the unfortunate event of disruptions

Global partners

Damco offers airfreight services through its global network of offices. Most of our volume is routed through strategic partners with whom we have deep and longstanding relationships. This enables us to secure capacity, control costs and attain high service levels.

In-house carrier through hub and gateway network

On selected high volume trade lanes, Damco operates a hub and gateway network, using our own controlled capacity through our in-house carrier. By careful selection of airports, and by using our own staff, we can ensure services that are frequent, cost-effective and highly reliable.

Security

Security is of course our number one priority in airfreight, at our own hubs and at all the other facilities we use. All our hub/gateway warehouses are TAPA 'A' and/or C-TPAT certified. We make extensive use of CCTV, and where possible we build our own units supported by photographic evidence of seals and ULD numbers. Pallets are check weighed at origin and destination. Our robust and comprehensive information systems also ensure that security authorities are not confronted with unexpected or non-compliant consignments.

About Damco

Damco is one of the world's leading third party logistics providers. Flexible enough to act on specific customer requirements and robust enough to deliver, Damco supports companies worldwide with customised freight forwarding and supply chain solutions that are innovative, sustainable and cost-effective. With 11,000+ employees and more than 300 offices in over 100 countries, Damco combines its global coverage with detailed know-how of local situations and procedures.
